AXIOM FOUNDATION

ORGANIZATION OVERVIEW
OCTOBER 2026

# Computable law for all.

The rules that decide who gets food assistance, health coverage, and tax credits live in closed code that no one outside the vendor can check. **The Axiom Foundation** publishes those rules in the open — cited and computable.

## WHAT WE DO

1. **Encode — we turn the law into software.** The encoder's signed apply manifest names the source citation and model. 34,803 of 34,832 US rules cite a source (October 2026).
2. **Verify — checks and waivers shape what merges.** CI skips compilation and companion tests for active entries on the public waiver list (1,935 entries, 23,666 of 34,832 US rules; October 18, 2026). The drafting model supplies expected test results. This workflow runs no PolicyEngine comparisons. October's coverage map ties 14,030 rules to compared programs, without establishing per-rule checks. Max Ghenis is CEO of both Axiom and PolicyEngine.
3. **Publish — we publish inspectable encodings.** The Axiom App shows the statute beside its encoding, openly licensed — so you can inspect what a rule computes.

*Encodings are published under CC BY 4.0 and the code under MIT – free to use, modify, and redistribute, with attribution.*

## WHAT WE ENABLE

| | |
|---|---|
| **Government** | **Stop paying to re-implement the same rules** — one cited, dated, executable encoding that delivery systems, auditors, and legislators all work from. |
| **Frontier AI labs** | **Make AI truthful about the law** — executable, cited code a model can call instead of guess, and an evaluation set for scoring what it answers unassisted. |
| **Research** | **A citable, executable corpus of law** — effective-dated encodings, a public file of which rules fall in compared programs, and an analyzable computation graph. |
| **Builders** | **Ground truth for the rules your product touches** — the hardest, least differentiated layer of your stack, maintained in the open instead of by you. |

## WHERE TO START

Open a rule and read the statute next to the code that runs it.

- **Use the app** — axiom.org/app.
- **Get in touch** — hello@axiom.org.
- **Meet the team** — axiom.org/team.
- **Subscribe for updates** — newsletters, product releases, and research: join the mailing list.

*A fiscally sponsored project of the PSL Foundation, which also sponsors PolicyEngine.*
